F10-12	12-1/4	11.00	11.00	11.00	11.00	11.00	11.00	11.00	11.00	11.00	11.00	11.00	11.00	11.00	11.00	11.00	11.00	11.00	11.00

Roof Table Notes:

Single Span, Uniform Load, Major Force Direction and unfactored for duration of load except as noted.

Total loads include live load, dead load and MPP self weight.

Deflection limits are for live loads. Total load deflection limits for live load deflection of L/360, L/240 and L/180 are respectively L/240, L/180, and L/120.

Maximum length of MPP is 48'. Therefore spans are limited to 46' assuming a 1 foot bearing length.
